

"RBI CALGARY HOCKEY TEAM SPIRIT ROCKS WITH THE ALBERTA ELECTRICAL LEAGUE!!

Calgary, Alberta, Canada – April 2013 Alberta Electrical League's 14th Annual Calgary Electric Club Hockey Challenge

Once again it was with great enthusiasm the staff at **Robertson Bright Co. Ltd.** showed the rest of the RBI family just what they are made of. Their spirit of sheer grit, determination, and skill as participants on the ice was obvious, not to mention the fine coaching and rousing support from the cheering section!

The Alberta Electrical League is an organization whose membership is open to companies and practitioners of every facet of the electrical industry in the province of Alberta. Its purpose is to promote the entire electric industry, identifying and implementing promotions to raise the public profile of the industry and to explore ways to develop and market new and existing business opportunities for its members. The "Hockey Challenge" started with four teams and has since grown to twelve entries made up of contractors, engineers, manufacturers and wholesalers. Aside from the obvious team building and networking benefits, each team sells raffle tickets, raising money that goes towards bursaries for the industry's next generation of up and comers.

Thank you to those who inspired and organized RBI Calgary's participation in this year's tournament. It promises to be the first of many tournaments to come and we know this team will continue to develop into the tournament winner someday soon! A special acknowledgement and thank you as well to Dave Schrader who filmed and produced the accompanying video highlights that proudly demonstrates the quality and depth of this team!
